👤 PROFESSIONAL SUMMARY

I am a student pursuing a Bachelor of Science in Computer Science. I have an excellent reputation for resolving problems, adapting to changing environments, and driving overall operational improvements. I am an experienced team player with over 3 years of experience working with a team.

PROJECTS

Software Engineer | Front-End Lead   06/2020 – present
OFF-TOP   https://github.com/Off-Top-App

- Developed various functions for the cross-platform mobile application, using Flutter. Some functions include configuring audio recording, Google Firebase authentication, and UI color themes.
- Created a back-end microservice with Spring-Boot Kotlin that utilizes Kafka Streams to stream and process aggregated objects into to a readable user report.
- Created Dockerfile images for microservices and containerized them using Docker-Compose.
- Developed a component for the web app that enforces Google Firebase authentication for user login with Angular.
- As the Front-end Lead: reviewed and approved pull requests, mentored team members, and worked with the Scrum Master to create new front-end tasks.
- Created documentation with the goal to help new members onboard with ease.

Front-End Engineer | Project Manager   02/2020 – 05/2020
Got Gainz   https://github.com/got-gainz

- Created onboarding functions to allow users to input and store their personal information.
- Created a service to persist data throughout the Flutter app.
- Assisted in the development of the UI and UX for the app.
- Created workout tracking and accompanying functions to update workout routines as users' progress their goals.
- As the Project Manager: assigned tasks, maintained the general scope of the project, and mentored developers with their tasks.
